

**SPECIAL NON MEDICATED
SULPHURLESS PHARMA GRADE**

GLOBULES

The sugar used by us for manufacturing **Globules**/pellets is refined by Defeco Re-melt Phospho- Floatation Process. By this process the sugar manufactured is of international grade, sparkling white in colour, Sulphurless and has high keeping quality/shelf life.

With the use of such superior quality of raw material, the **Globules** manufactured by us are brilliant white in colour, Sulphurless and have excellent absorption capacity. The globules are also uniform in shape and size than others available in the market.

Most of the sugar manufacturers in India use Sulphur dioxide process for whitening sugar. Sugar manufactured by this process is banned in most European Countries, as Sulphur dioxide is considered harmful for health.

SIZES

We manufacture **Globules** in following sizes :
No.10, No.20, No.30, No.40, No 50, and No.60

On special orders in sufficient quantity
we can manufacture the same in any desired size.

450 g Pouch Packing, 15 kg / 30 kg HDPE Bag with LLDPE Liner Packing
